- Travelling
- Programming Challenges

PROJECTS

Ultimate Snake – Python

December 2014 | GitHub/Ultimate_Snake

- Programmed and designed a snake game in **Python** with multiple game modes, AI, and graphics
- User can play alone, against computer, or against another player
- Utilized the **Pygame** library.

Personal Website – HTML, CSS, JavaScript

August 2016 | www.ivannesevski.com

- Built a fully responsive personal website
- Utilized **HTML**, **CSS**, **JavaScript/JQuery** and **Bootstrap**

Airline Booking App – Java

December 2015 | GitHub/Airline_Booking_App

- Programmed an android flight booking app (proof of concept) with a team of 4 using **Java** and the **Android SDK**
- As a team leader I assigned roles for team members and managed the development of the app

MovieHub – HTML, CSS, JavaScript, Node.js

December 2016 | GitHub/MovieHub

- Built the front-end and back-end for a website where users can recommend or not recommend a movie
- Utilized **HTML, CSS,** and **JavaScript/JQuery** to design the front-end
- Used **Node.js** and a **MongoDB** database to implement the back-end.

WORK EXPERIENCE

Volunteer – Mississauga Little Aces Tennis Community

October 2012 – May 2013

- Set up court, monitored scores, assisted parent coaches, and practiced with the children in two minor leagues

Office Assistant – Lennox Industries (Canada)

July 2015 – August 2015

- Filed and sorted documents for several departments and helped many employees who needed assistance after company move

SUMMARY

- Experience with modern web development tools and frameworks
- Determined problem solver and creative thinker
- Passion for innovation and learning new things
